

Benefits and Cost of Plastic Surgery in Kolkata

What is Plastic Surgery?

It refers to surgical treatment for attaining a more improvised appearance. It is now a global phenomenon. People, both young and aged, are undergoing surgical procedures to look better. People with defective facial structures and other external body parts are eligible for the treatment. It is the most effective surgical breakthrough to beautify one's appearance.

Types

It includes two broad categories – reconstructive and cosmetic surgeries.

Reconstructive Surgery

It involves repairing a defective part (s) of the body caused by a disease or a severe injury. The most common examples are all kinds of breast modifications, cleft lip restoration, burn treatment, etc. This method helps the affected body part to act normal.

Cosmetic Surgery

It involves beautifying a person's appearance. Thus, surgeons perform reshaping body parts, especially facial framing. To enhance the outer look, people often undergo [breast lifts](#), [nose lifts](#), eyelid surgery, etc.

Why do people need plastic surgeries?

Not everyone is happy with their natural looks. Today's HD world requires picture-perfect faces. The reasons for people going through plastic surgeries may include:

- To acquire an improved appearance
- To restore functions of defective body parts
- To get rid of unwanted birthmarks and scars
- For a better quality of life
- To be confident with the desired look

What are the most commonly performed plastic surgeries?

Here goes the list of the surgeries:

- Eyelid surgery
- Rhinoplasty (nose surgery)
- Cleft lip and palate repair
- Eyebrows lift
- Chin, cheek and jaw reshaping
